Application/Control Number: 09/577,927

Art Unit: 2878

1. Claim 25 is objected to because of the following informalities: the claim does end with a period. Appropriate correction is required.

- 2. The reissue oath or declaration filed with this application is defective because it fails to describe the actual error(s) in the patent, i.e., it fails to particularly specify the "defects" in the specification or drawing, 37 CFR 1.175(a)(2); and/or it fails to distinctly specify the "excess or insufficiency" in the claims, 37 CFR 1.175(a)(3). The applicant has not stated which part of the claims is insufficient and prevents them from obtaining the scope of the submitted new claims.
- 3. Claims 25-39 are rejected as being based upon a defective reissue declaration under 35 U.S.C. 251 as set forth above. See 37 CFR 1.175.

The nature of the defect(s) in the declaration is set forth in the discussion above in this Office action.

4. Claims 25-29 are rejected under 35 U.S.C. 251 as being an improper recapture of broadened claimed subject matter surrendered in the application for the patent upon which the present reissue is based. See Hester Industries, Inc. V. Stein, Inc., 142 F. 3d 1472, 46

USPQ2d 1641 (Fed. Cir. 1998); In re Clement, 131 F. 3d 1464,45 USPQ2D 1161 (fED. CIR. 1997); Ball Corp. v. United States, 729 F. 1429, 1436, 221 USPQ 289, 295 (Fed. Cir. 1984). A broadening aspect is present in the reissue which was not present in the application for patent.

The record of the application for the patent shows that the broadening aspect (in the reissue) relates to subject matter that applicant previously surrendered during the prosecution of the application. Accordingly, the narrow scope of the claims in the patent was not an error within the

Art Unit: 2878

meaning of 35 U.S.C. 251, and the broader scope surrendered in the application for the patent cannot be recaptured by filing of the present reissue application. Specifically, applicant can not acquire claims that are broader in an aspect germane to a prior art rejection and narrower in another aspect unrelated to the rejection. The reissue claims' scope are narrower with respect to applicant's patent claims of a taggant method such as the use of a pen or in clothing, but broader with respect to using isotopic taggant or defining the specifics of the isotopic ratios that were argued in the rejection of the initial claims in the parent application.

- 5. Claims 1-24 allowed.
- 6. The following is a statement of reasons for the indication of allowable subject matter: The prior art does not show using taggants with artificial isotopic abundance ratio which are unchanged by chemical reaction. Also not shown is using two elements as taggants each having two stable isotopes with artificial isotopic abundance, or a way of correcting for contaminates.
- 7. The applicant is reminded that when the application is in condition for allowance the original ribboned patent must be submitted or an affidavit explaining its loss or inaccessibility.
- 8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to R. Hanig whose telephone number is (703) 308-4853; or the receptionist (703) 308-0956. Fax No. (703) 308-7722.
